PROFESSIONAL SUMMARY

Java Software Engineer with 4 years of enterprise experience developing, modernizing, and supporting dealer-facing applications at General Motors. Experienced designing, modernizing, and supporting enterprise Java applications through full-stack development, application ownership, cloud migrations, and production support using Java, Spring Boot, Angular, Kubernetes, Oracle, and PostgreSQL.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, C++, C, Bash, HTML, CSS

Frameworks: Angular, Spring Boot

Dev Tools: Git, GitHub, Jira, Confluence, IntelliJ IDEA, VS Code, Cursor, GitHub Copilot

Infrastructure : TomEE, WebLogic, Kubernetes,

Databases: Oracle DB, PostgreSQL, SSMS (SQL Server)

Other: Agile/Scrum, Technical Documentation, Bilingual English/Spanish

WORK EXPERIENCE

General Motors, Austin, TX

May 2022 – May 2026

Software Engineer

NAOWB – North America Order Workbench | Supporting Engineer

- Modernized a dealer-facing order management platform serving thousands of dealers across the U.S., Canada, and Mexico that shipped to production in May 2023.
- Engineered a table customization widget enabling dealers to configure their own data views, reducing friction across a high-volume user base.
- Delivered bilingual (English/Spanish) localization support, ensuring accurate UI translations across all dealer-facing surfaces.

OVOFS – Central America & Caribbean Order Workbench | Application Owner

- Led production support and release coordination while driving technical debt reduction for a regional dealer application serving Central America and the Caribbean.
- Led WebLogic-to-Kubernetes infrastructure migration, improving deployment reliability and setting the foundation for cloud-native operations.
- Planned and initiated an Oracle-to-PostgreSQL migration, establishing the foundation for future cloud-native database modernization before project reprioritization.
- Authored in-depth documentation for undiscovered failure scenarios, creating a durable knowledge base for future maintainers.

GDO – Brazil, Argentina & Andean Region Order Workbench | Supporting Engineer

- Revived a stalled enterprise application with no knowledge transfer after the prior team was dissolved and independently reconstructed deployment runbooks and restored production viability.
- Executed the first successful production deployment of GDO in over a year.
- Drove WebLogic-to-TomEE 7 server migration for both corporate and dealer environments; scoped and initiated follow-up TomEE 9 batch server upgrade.

SOFIA – Mexico Dealer Application | Alternate Application Owner

- Provided production support for a legacy dealer system (Java, C, SSMS), resolving data integrity issues and documenting recurring failure patterns for the primary owner.

University of Texas Rio Grande Valley, Edinburg, TX

Sep 2018 – May 2022

Computer Support Assistant

- Developed an Excel-based inventory tracking system supporting College of Engineering computer labs.
- Maintained lab hardware and software environments including operating system deployments, imaging, hardware repair, and account management documentation.

EDUCATION

Bachelor of Science (B.S.), Computer Science, Minor in Statistics

Summer 2021

University of Texas Rio Grande Valley, Edinburg, TX
